

# 12-Month Marketing Plan

Excerpt · quarters, channel mix and the measurement plan

Sample data - portfolio illustration

## The one-line strategy

Stop buying reach and start buying enrolments. Every quarter has one job, one lead metric, and one thing we stop doing. Nothing is added to the plan without something coming off it.

### Q1 Fix measurement

Get the funnel honest before spending more.

SUCCESS LOOKS LIKE: **Every lead has a source and a status**

### Q2 Cut what is not working

Kill the bottom-quartile ad sets, reinvest in the top two.

SUCCESS LOOKS LIKE: **Blended cost per lead under \$60**

### Q3 Scale the winners

Same creative formula, more locations, more budget.

SUCCESS LOOKS LIKE: **Enrolments up 25% year on year**

### Q4 Build the owned channel

Email and referrals, so next year costs less to start.

SUCCESS LOOKS LIKE: **30% of leads from non-paid sources**

## Where the budget goes

■ Paid social 52% ■ Search 18% ■ Content and SEO 14% ■ Email and CRM 9% ■ Events and referral 7%

## How this gets measured

One dashboard, refreshed hourly from the CRM, showing cost per lead and lead-to-enrolment by location. One automated weekly report every Monday. No manual exports anywhere in the chain, because a number a person retypes is a number that eventually goes wrong.

### Hourly

dashboard refresh

### Monday 06:00

weekly report, automatic

### Zero

manual exports
