

Weekly Performance Report

Week 34 · 18 - 24 Aug · all locations

Sample data - portfolio illustration

The week in four numbers

\$53.72 cost per paid lead (-6.2% WoW)	214 enrolments (+11 WoW)	1,056 leads in (+4.1% WoW)	20.3% lead to enrolment
--	------------------------------------	--------------------------------------	-----------------------------------

What moved

Cost per lead fell for the third week running, driven mostly by the paid-social rebuild at Fairmount and Ashgrove. Both now sit comfortably under the \$60 target. Northgate is the one location moving the wrong way and is flagged below.

Spend and return by channel

Channel	Spend	Leads	Cost / lead	Enrolled
Paid social	\$24,440	455	\$53.71	112
Website form	\$0	296	-	62
Walk-in	\$0	134	-	22
Referral	\$0	104	-	13
Phone	\$0	67	-	5
Total	\$24,440	1,056	\$23.14 all-in	214

All-in divides total spend by every lead, paid or not. The headline \$53.72 is paid social only.

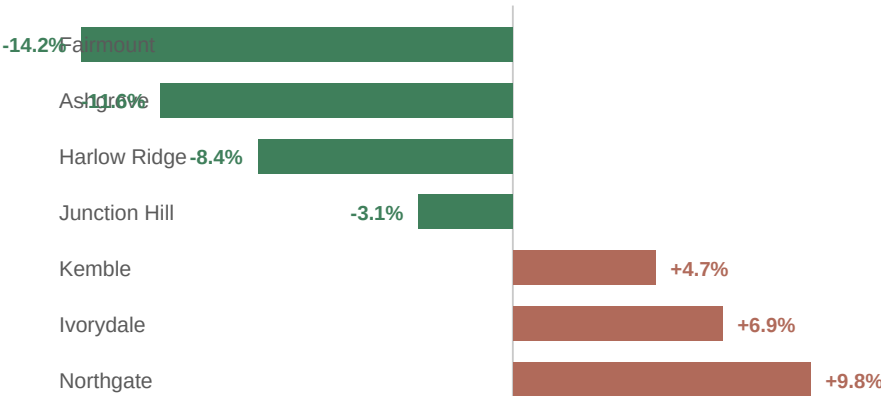

Flagged this week

- Northgate - \$74.50 cost per lead, 13.8% conversion. Worst on both measures for a third week. Recommend pausing the current ad set and reusing the Fairmount creative.
- 241 leads still carry no status. Names are attached per location in the funnel report so each site can work its own pile.
- Ivorydale - 71 leads, only 39 contacted. The gap is response time, not lead quality.

Next week

- Rebuild the Northgate ad set on the Fairmount template.
- Chase the no-status pile at Carrow Park and Eastvale first - biggest piles.
- Second creative test at Ivorydale, response-time focused.

Biggest movers, week on week

Change in cost per lead against last week. Left of the line is cheaper, right is dearer.

Assembled automatically every Monday 06:00 - previously three hours by hand.
